FAX: (214) 670-6051

In accordance with the best management practices for aircraft deicing/anti-icing listed below, I submit the following:

Name of Company: _____

Contact Name: _____

Date of Deicing/Anti-icing: _____

Time of Deicing/Anti-icing: _____

Amount of Deicing/Anti-icing Fluid Used: _____

Type of Deicing/Anti-icing Fluid Used: _____

REQUIRED AIRCRAFT DEICING/ANTI-ICING PRACTICES

1. Contact Airport Operations **each day** that you conduct deicing/anti-icing, at (214) 670-6156.
2. At the end of each deicing event, inform the Environmental Management Section, via FAX (214) 670-6051, stating the amount and type (ethylene glycol, propylene glycol, 50-50 mixture, etc.) of aircraft deicing fluid (ADF) used.
3. During dry weather deicing/anti-icing, cover all storm water drains within 50 feet of the airplane or area where the deicing/anti-icing process will occur to prevent the flow or discharge of ADF into the storm water system.
4. Collect and remove the deicing/anti-icing residual remaining on the ground as soon as possible after the completion of each deicing procedure to minimize the pooling and/or discharge of ADF into the storm water system.
5. Properly dispose of the collected material.
