And more!

Special appearance by Dew, the Dallas Water Conservation mascot

Learn how you and your family can be environmentally friendly.

Come see us at the fourth annual City of Dallas Environmental Education Initiative (EEI) community fair, Conservation in Action. The fair will feature water conservation, recycling and environmental education activities and exhibits at Texas Discovery Gardens in Fair Park, the first certified organic public garden in the state. The gardens feature native and adapted plants grown using sustainable methods that conserve water and protect the environment.

Enter Fair Park at the Gate 6 parking lot, at the intersection of Robert B. Cullum Blvd. and Martin Luther King Jr. Blvd. Parking is free; signs will direct you to Texas Discovery Gardens.

Free T-shirts, posters, hot dogs, popcorn and bottled water to the first 500 participants!

For additional information, call 214/670-3155.

Sponsored by City of Dallas, University of North Texas and Texas Discovery Gardens.
