

PLUMBING AND MECHANICAL
INTERPRETATION MANUAL

CODE: 2003 Energy Code

DATE:

CODE REF:

11/3/2003

SUBJECT: Energy Code

Effective January 1, 2006 enforcement of chapter 11 of the 2003 IRC and 2003 International Energy Code will go into effect. This will mean that plumbing and mechanical inspections will now include the following required provisions. It is required upon completion of the project that it be certified to be energy compliant. As part of your inspections regarding these sections you are not certifying the building as energy compliant but ensuring those provisions of the energy code are met.

1. Section N1103 (IRC)
2. Section N1104 (IRC)
3. Section 503 (IECC)
4. Section 504 (IECC)

Attached you will find copies of these sections. Time should be given to study the provisions of each of the International Residential Code and the International Energy Conservation Code.

These codes became effective January 1, 2006.
