

PLAN REQUIREMENTS: (Attach blue prints or draw details on back of this page)

1. Show a top view of the cart indicating the dimensions (to approximate scale). Include a layout of all equipment and supplies, including soap and paper towels, condiments, ice bins, refrigerator, water heater, etc.
2. Include operator's side view of the cart showing the dimensions and layout of all equipment. Include side and front view dimensions.
3. List the finishes on all the surfaces and the awning or overhead cover.
4. List the make, model and capacity of the refrigerator (electrical cord not to exceed 10 feet).
5. Provide a list of all equipment to be used on the cart.

PLUMBING/PIPING DIAGRAM

1. There must be at least 4 gallons of potable water at the cart for hand washing purposes and 5 gallons for utensil washing purposes (tempered by means of a mixing valve). The potable water source shall be protected from contamination and design to preclude attachment of a non-potable service connection. The wastewater holding system must be a minimum capacity of 15% larger than the fresh water capacity. If additional water is needed, show the additional system capacities and storage.
2. Indicate how the fresh water system will be pressurized.
3. Indicate that all fresh water piping is drinking water approved.
4. Detail water heating system and how the water will be heated. NOTE: Ideal water temperature for handwashing should be no less than 110°F (degrees Fahrenheit).

COMMISSARY INFORMATION

1. You must use only an approved and permitted commissary. The commissary must be approved by the health department prior to issuing the Mobile Food Unit Permit.
2. If you own the commissary, provide a copy of the health permit and a copy of the last inspection report.
3. If you do not own your commissary, obtain a Commissary Approval form and have it completed and signed by the commissary owner and notarized. Provide a layout of the commissary detailing the area for disposal of wastewater, storage areas, sinks and refrigeration.

RESTROOM FACILITIES

Restroom facilities must be conveniently located at the service site.

NO CHANGES MAY BE MADE WITHOUT HEALTH DEPARTMENT APPROVAL
