
TEXAS CLEAN AIR CITIES COALITION

**The public is invited to attend the next TCACC Membership Meeting on
Tuesday, February 20th in Waco**

6:30 PM

Waco Convention Center

***Help us make a statement: The media will be on hand as charter buses leave Dallas to
take 300 people to this event!***

On the eve of the permit hearing for proposed coal-fired plants, the TCACC will release the results of the most comprehensive air modeling ever performed in the state on the effects of 18 new coal plants currently proposed for Texas, including 11 TXU plants.

By combining this air modeling with Google Earth technology, you will be able to see animation depicting the emissions coming from the proposed plants and traveling the skies over the State of Texas.

An academic team led by Dr. David Allen, Director of the Center for Energy and Environmental Resources at the University of Texas-Austin, performed the air modeling over the past several months at the request of TCACC.

Steve Susman of Susman Godfrey LLP will also present an overview of the TCACC's case to the state.

Dr. Allen, who serves on the Environmental Protection Agency's Science Advisory Board, will testify on the results of his air modeling in the permit hearing scheduled to begin the following day, February 21st, in Austin on six of TXU's plant applications.

The TCACC is made up of 36 cities, counties and school boards across the state representing 7.2 million Texans.

TRANSPORTATION

Charter Bus departing from: Reunion Arena

Cost: FREE (Snacks will be provided)

Boarding: 3:30PM-3:45PM

Buses Depart: 4:00PM

RSVP by Friday, February 16th to 214-670-4054

MEETING

Waco Convention Center

Tuesday February 20th, 2007

6:30 PM
