Lake June Project Overview

**Dallas
Water Utilities**

The project is located in Southeast Dallas

Garver's design and construction approach minimizes impacts to the community

**Dallas
Water Utilities**

Lake June Pump Station is critical to the Dallas Water Utilities system

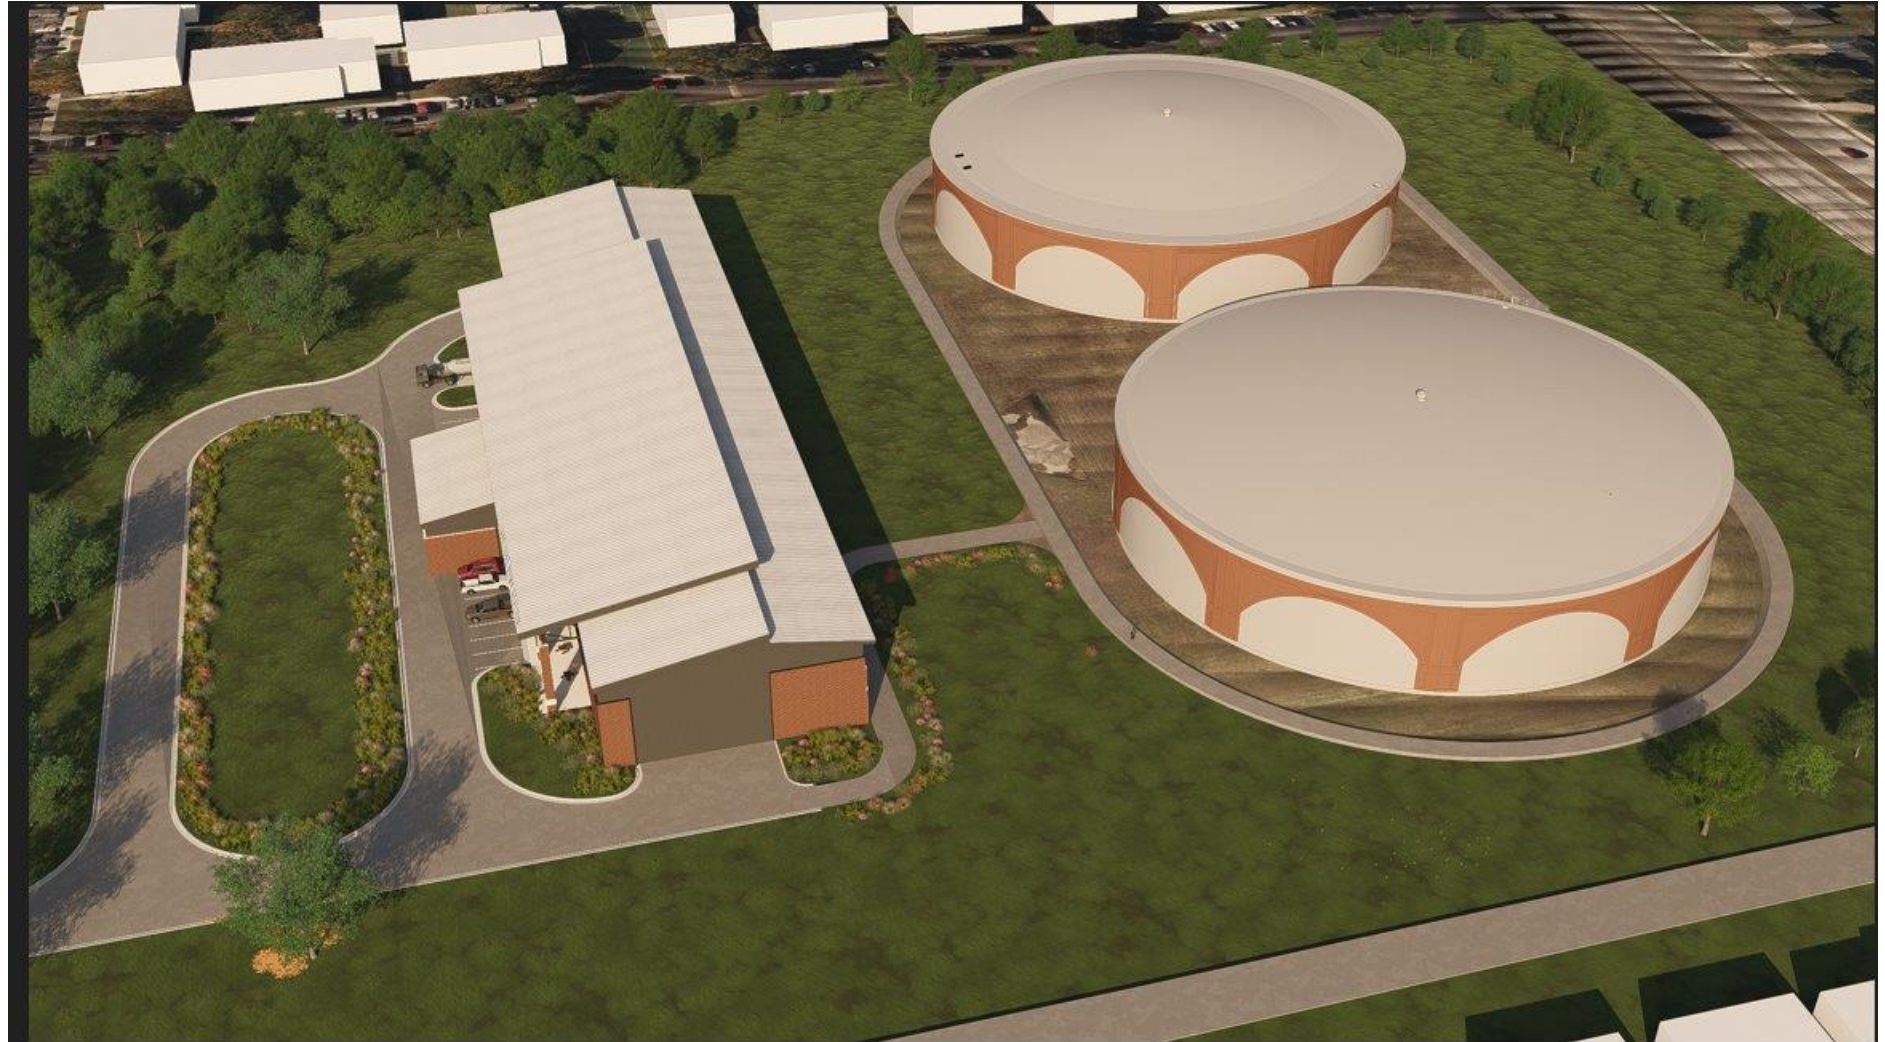

- Concrete failure and risk of structural failure
- Electrical systems that are obsolete
- Critical assets that are beyond useful life.

Dallas
City of Dallas | **Water Utilities**

The project scope includes two new ground storage tanks and a new pump station

Ground storage tanks will be built first, and construction is expected to start November 2025

The new pump station and ground storage tanks will fit into the community

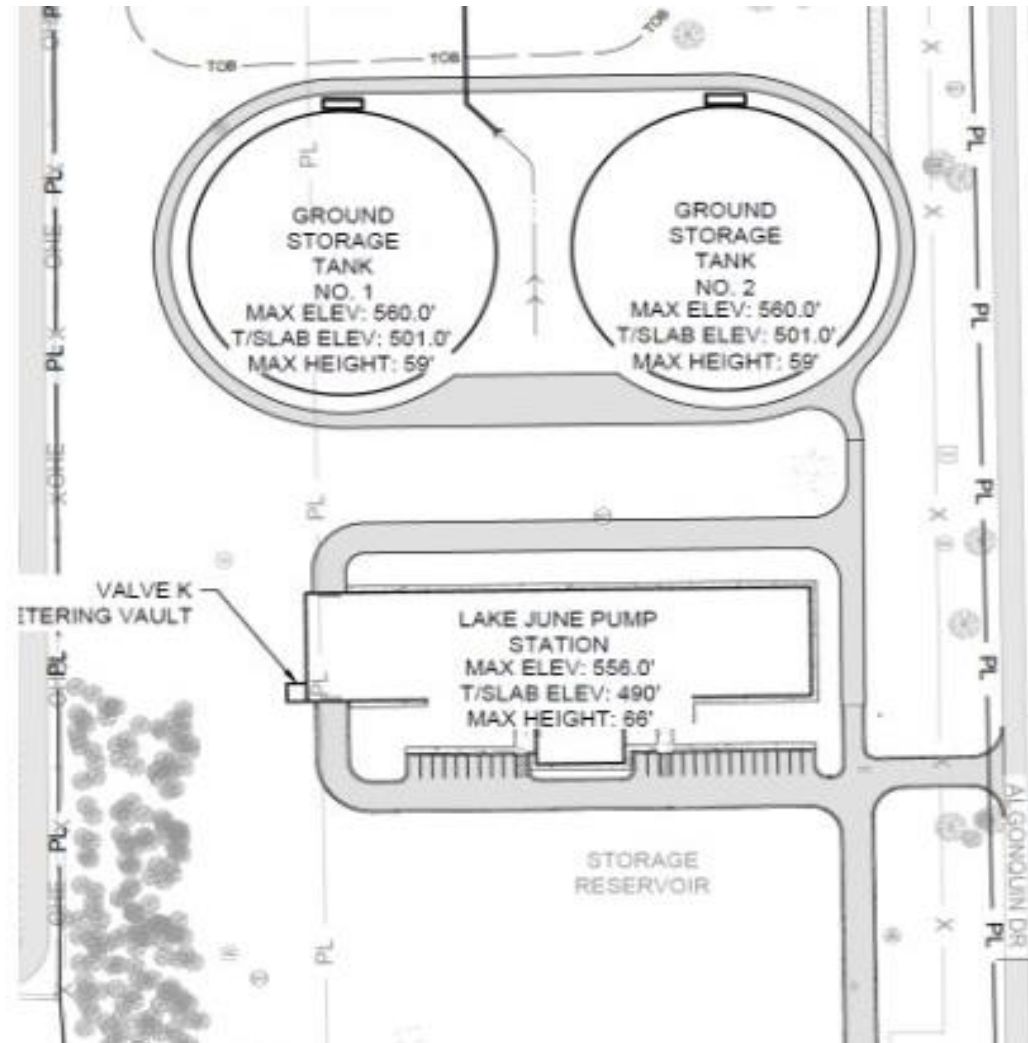

The project is broken into two construction packages

Construction Package A: 11/2025-11/2027

Construction Package B: 3/2028-3/2031

Special Use Permit No. 145 Amendment

Special Use Permit No. 145 Amendment

- Request:

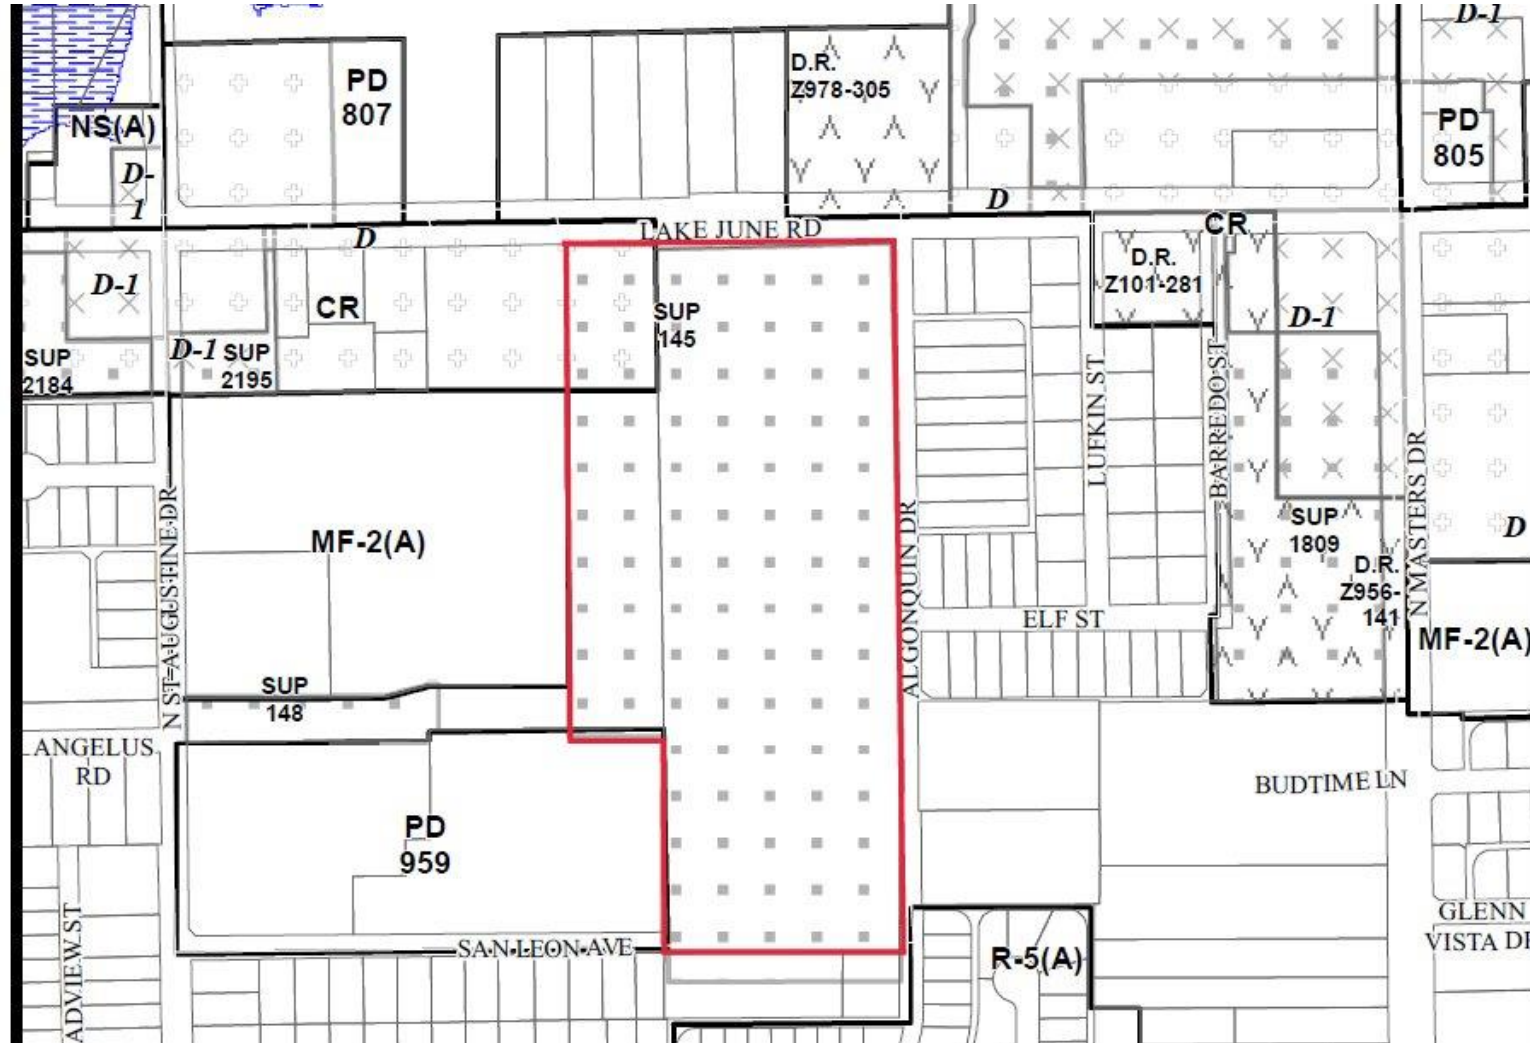

To amend the current Specific Use Permit (SUP) #145 for the property to allow for a new pump house and above ground water storage tanks.

The SUP request number is Z245-203 (Z-25-000006). It is scheduled to be heard by the City Plan Commission on June 26, 2025.
